### Tree of Heaven Remediation Program on hold for the Winter

The Ashcroft Tree of Heaven remediation program has been put on hold and will resume next spring. During the Fall and through the Winter, the Tree of Heaven (*Ailanthus altissima*) enters into dormancy. As a result, applications of glyphosate are not effective and will not be effective again until Spring arrives. The Village remains committed in the effort to eradicate this invasive species from within our municipal boundaries. Please keep the Village posted if you see this invasive plant pop up in your yard.

### Water Quality Advisory has been removed—Water is now considered safe.

Ashcroft water customers are advised that the level of turbidity in the Thompson River has dropped below 1.0 NTUs. As a result, the Water Quality Advisory has been removed and the water is considered safe even for those with compromised immune systems.

2018 experienced elevated turbidity levels for an unusually long period of time. This was likely due to run-off from large areas of land burned during the wildfires through out 2017 and 2018.

The Village would like to remind residents to keep informed on current turbidity levels as levels may change at anytime, especially during periods of heavy rain. The Village is looking forward to the completion of the Water Treatment Plant project and the commissioning of the facility. The new Water Treatment Plant will remove all turbidity from the source water through the membrane system used in the water treatment process. This means that Water Quality Advisories and Boil Water Notices will be a thing of the past once the Water Treatment Plant is operating.
