Billy has 7 crayons, and he loses 2.

How many has he now?

Can you work this out in numbers?

Jane has 10 cents, and she goes out shopping.

She spends 5 cents. How much has she left?

There are 2 large icicles and 3 small ones hanging from your roof. Out comes Mr. Sun, and melts 1 large one and 3 small ones. How many large and how many small ones are left?

$8 - 6 = 2$. How many boys and girls can make a little story about $8 - 6$ and write it here?
