

Fire Update

The fire showed aggressive behaviour last night which caused some growth.

The fire settled down early this morning.

The Ashcroft FD is back in town and providing support if Forestry requests it.

There is outside support coming in for Structural Protection.

At this time the Village of Ashcroft is NOT at risk.

The Village will continue to monitor and update the community on the status.

We are in regular communication with PREOC (Provincial Regional Emergency Operating Center) and EMBC (Emergency Management BC) and BC Wildfire.

It is a good time to be prepared, but not cause any undue stress.

Thank you to all responders that actioned the fire last night.
